Q.] Write a program to create an Ionic User Registration application using Reactive Forms. Accept Username, Email, Password, and Confirm Password, validate the input fields, and display appropriate validation messages.

Aim :-

To create an Ionic Angular User Registration application using Reactive Forms and validate Username, Email, Password and Confirm Password fields.

Objective

- To create an Ionic Angular registration application.
- To understand Reactive Forms.
- To validate user input using Angular Validators.
- To display appropriate validation messages.
- To validate password and confirm password.
- To use Ionic input and button components.

```
import { Component } from '@angular/core';
```

```
import {
```

```
  IonContent,
```

```
  IonInput,
```

```
  IonButton
```

```
} from '@ionic/angular/standalone';
```

```
import {
```

```
  FormBuilder,
```

```
  FormGroup,
```

```
  Validators,
```

```
  ReactiveFormsModule
```

```
} from '@angular/forms';
```

```
@Component({
```

```
  selector: 'app-register',
```

```
  templateUrl: './register.page.html',
```

```
  standalone: true,
```

```
  imports: [

ReactiveFormsModule  
]  
})  
export class RegisterPage {  
  registerForm: FormGroup;  
  
  constructor(private fb: FormBuilder) {  
    this.registerForm = this.fb.group({  
      username: ['', [  
        Validators.required,  
        Validators.minLength(3)  
      ]],  
      email: ['', [  
        Validators.required,  
        Validators.email  
      ]],  
      password: ['', [  
        Validators.required,  
        Validators.minLength(6)  
      ]],  
      confirmPassword: ['', [  
        Validators.required  
      ]]  
    });  
  }  
  
  register() {  
    if (this.registerForm.valid) {
